# Seamless Product Development

## Embedded Boards, Displays & Cable Solutions from Concept to Completion

Discover how our joint expertise – from early-stage embedded design to bespoke cabling solutions – delivers a seamless journey for your product development.

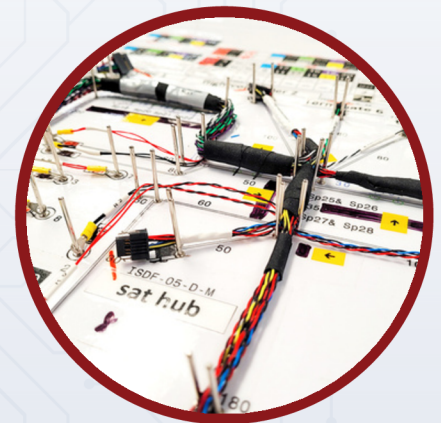

## Bespoke Embedded Boards

- ❯ x86 and ARM technologies
- ❯ Early-stage prototyping to test designs
- ❯ Full hardware and software support

## Custom Cable Assemblies

- ❯ Engineered for unique requirements
- ❯ Robust connectivity capabilities
- ❯ Internal and external cabling

## Complete Display Solutions

- ❯ Outstanding visual performance
- ❯ Interface and connectivity come together
- ❯ Create a unique HMI for your application

Engaging in joint planning early on can optimise both the embedded and interconnect design processes. An initial consultation with both RDS and GTK ensures your design roadmap includes a seamless transition from concept to finished product.
