

Our agility to support your product development cycle

Alongside our team of experts in the UK, GTK has design, engineering, technical and manufacturing resources in multiple locations worldwide. Our infrastructure enables us to support any supply requirements, no matter how complex.

We can support customers at any stage of their product journey, from design through to installation. Our engineers and production teams are on hand to help deliver high quality, cost-effective product to customers, wherever and whenever they need them.

Pre-Production & DFM Support

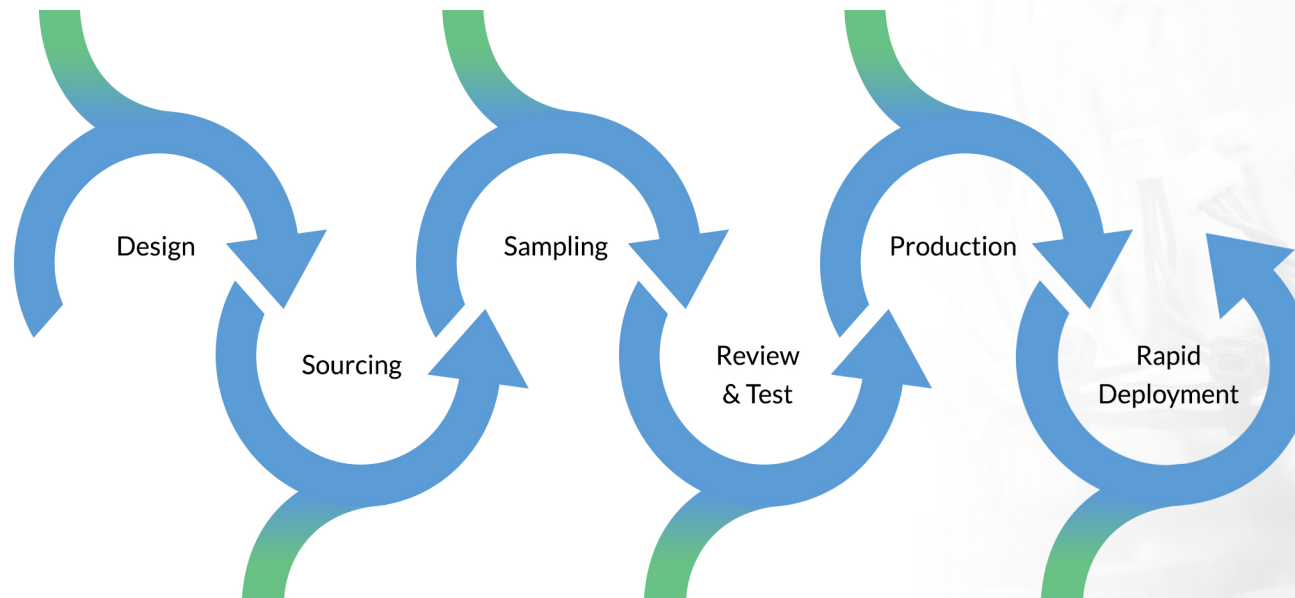

We can take concepts and help develop them into a prototype product.

Rapid Prototype Build Service

We can help customers meet demanding design schedules with quick delivery of samples.

Global Manufacturing

We can leverage our global manufacturing footprint to create unique build models that provide the most cost-effective products.

Supply Chain Management

We help customers reduce the cost of an existing product, utilising GTK's extensive supplier network.

Engineering Support

Our engineering team works closely with customers at every step to ensure that their products are fit for their intended purpose.

Customer Flow Lines

We can offer customers dedicated manufacturing services with in-house engineering support to help them overcome a supply issue.

- GTK manufacturing locations in the UK, Romania and the Far East, supported by Volex's global footprint
- Support for cable assemblies, power cords, connectors and displays
- Full turnkey electronics solutions, including PCBA, encapsulation and overmoulding
- Engineering expertise to deliver a level of customer support that sets us apart from other manufacturers
