

## GTK Declaration according to The Persistent Organic Pollutants Regulations 2025

### UK and EU

GTK declares that there are no persistent organic pollutants (POPs) in the products produced for our customers. Based on our production knowledge and declarations collected from the upstream supply chain our products comply with the POPs Regulations and do not contain substances subject to prohibitions within.

These regulations deal with the protection of the human health and the environment against these substances by a preferably early elimination of production, or accordingly, by the limitation to a minimum regarding manufacturing, placing on the market and usage of these substances.

Furthermore, the regulation defines provisions about waste which consist of these substances, in which these substances are contained, or which are contaminated by these substances; we do not use POPs in our manufacturing process chain.

Should you have any further questions please speak to your sales contact.
