

Thunderbird with IMAP Mail Setup Guide

Settings overview

Your name	[the name displayed so people can identify you and reply to you e.g., "Webnetism Support" for support@webnetism.com]
Username	[your email address]
Password	[your password]
E-Mail Address	[your email address]
Account Type:	IMAP
Incoming mail server:	mail.webnetism.com
Outgoing mail server (SMTP):	mail.webnetism.com
My outgoing server (SMTP) requires authentication	True (ticked): <i>Use same settings as my incoming mail server</i>
Incoming server IMAP (port):	993
Incoming server encrypted connection:	SSL/TLS
Outgoing server SMTP (port):	465
Outgoing server encrypted connection:	SSL/TLS

1. If this is the first time you have opened Thunderbird skip to step 2. Otherwise, on the main page under the heading "**Choose what to set up**" click "**Email**"

- In the window called **“Set Up Your Existing Email Address”** enter the below details and click **“Configure Manually”**.

Your Full Name: Your full name.

Email Address: Enter the email address you’re setting up (e.g yourname@yourdomain.co.uk).

Password: Enter your email password.

- Next input the below details (**See Settings Overview for correct settings**) and click **“Done”**.

4. Click “Finish”.
