Outgoing server encrypted connection:	TLS/SSL

1. To set up an email account on iOS, firstly tap **"Settings"** on the home screen.

2. Next, scroll down and click **"Apps"** and then click **"Mail"**

3. Tap **"Mail Accounts",** and then click **"Add Account"**

4. Click **"Other"**

5. The "**New Account**" window will appear, enter the following details on this page and tap **"Next":**

| Field	Instruction / Detail
Name	Enter a friendly name you want others to see (e.g., your full name).
Email	Enter your full email address.
Password	Enter the password associated with your account.
Description	Enter a description for your email account (e.g., Work).

6. Before you enter any details make sure you are on the "**POP**" tab not "**IMAP**".

Then enter the below information that is required on this page for the **incoming** and **outgoing** servers and click **"Save".**

Field	Value
Host Name	mail.webnetism.com
Username	Your full email address
Password	Your email password

7. Decide whether you want to use Notes and then tap **"Save"**.
